

ARMONY

CLEANS AND DISINFECTS NATURALLY

IN HARMONY WITH YOUR HEALTH AND THE ENVIRONMENT

ARMONY

A NEW GENERATION OF DISINFECTANTS AND ANTIMICROBIAL CLEANERS

A food grade composition with active ingredients from natural sources

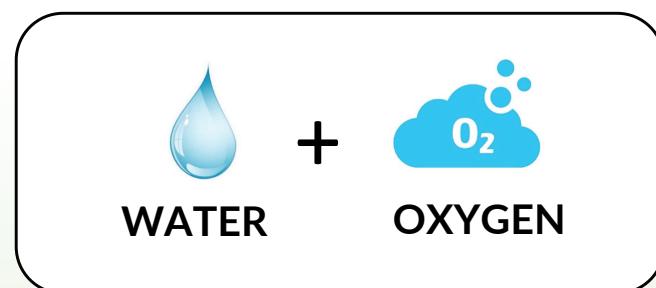

ARMONY

A UNIQUE NATURAL ANTIMICROBIAL COMPOSITION

Efficient, safe and present in all Armony products

Our unique antimicrobial composition utilizes lauric arginate, an edible antimicrobial surfactant that is fortified with food grade hydrogen peroxide to provide broad spectrum antimicrobial efficacy.

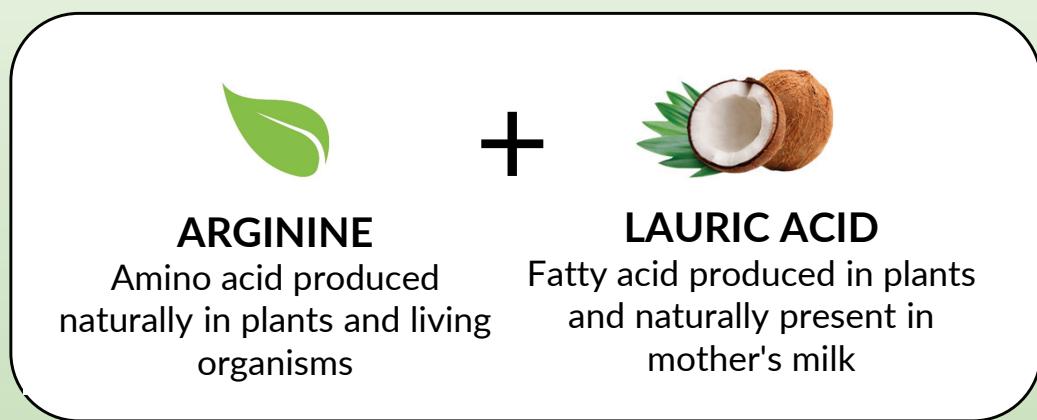

Derived from nature and from a renewable source, this antimicrobial composition is safe and can even be easily and quickly metabolized by the human body into constituent products naturally found in living beings, namely water, oxygen, arginine and lauric acid.

HYDROGEN PEROXIDE

LAURIC ARGINATE

*Innovation from MicroBio Solutions Inc.
Formulation resulting from a patented technology*

ARMONY

HEALTH, A PRIORITY

Did you know that there are no safety standards for cleaners labeled as "natural"?

This means that "natural" cleaners often contain chemicals linked to **endocrine disruption, cancer, asthma and allergies.**

For exemple :

- Fragrances often contain **several toxic** additives like phthalates, but you won't find these hormone disruptors on labels.
- Disinfectants often contain **quaternary ammoniums (QUATs)** as active ingredients, and these are linked to **asthma** and hormone disruptors.

	ARMONY	Competition
Allergens		
Fragrance		
QUATs or others hormone disruptors		
Respiratory irritant		
Harmful chemical residue		

Armony uses only food grade ingredients certified without harmful chemical residue, so you don't have to worry about using our products in the kitchen, around your children or pets.

ARMONY

DISTINCTIVE ELEMENTS THAT EXPRESS WHAT IS AT THE HEART OF OUR CONCERNS

Food grade guarantees that ingredients are **free of harmful compounds** or that are of concern to health.

Hypoallergenic and fragrance-free: fragrances are the main cause of allergic reactions.

Safe and without chemical ingredients listed in Proposition 65 or considered of concern by the **EWG** organization or listed as banned and restricted compounds by the UL **Ecologo** program.

Organic ingredients of **plant origin**, **respectful** of the principles of vegan, kosher and halal diets.

Easily **biodegradable** ingredients, from natural and **renewable** sources.

Our fruit and vegetable cleaners tackle **food waste** by reducing contamination and rot on food;

Our bottles are **100% reusable** and recyclable. **Bulk-at-home** formats and **bulk-in-store** stations are available.

ARMONY

ANTIMICROBIAL CLEANING FOAM

- ✓ Plant-based antibacterial cleaner with residual protection that helps prevent contamination
- ✓ Fragrance-free, hypoallergenic and gentle on the skin
- ✓ Safe for children
- ✓ Made with naturally sourced ingredients, certified to be free of chemical contaminants

VS ALCOHOL GEL

Alcohol gel remains an effective option but has no residual antimicrobial protection and may be irritating and pose a risk of poisoning in children. The added fragrances are often allergens.

NO RINSE FOAM

Formats :

- Foam pump 50ml and 500ml
- 1L refill
- BULK at home 10L ECOPACK
- BULK in store

www.armony.bio

ARMONY

FRUIT AND VEGETABLE WASH

- ✓ Cleans with plant-based antimicrobial action that reduces the occurrence of mold
- ✓ Removes dirt and pesticides
- ✓ Reduces food waste
- ✓ Tasteless and odorless and certified chemical contaminant free

READY TO USE

Formats :

- 710 ml
- 710 ml refill
- BULK in store

DID YOU KNOW THAT

The ARMONY fruit and vegetable wash is designed to ensure food safety is recognized by Health Canada to be efficient against E. coli, Salmonella and Listeria, the most common pathogens in food.

CONCENTRATE FOR SOAKING SOLUTION

1L of concentrate = 125L soaking solution

Formats :

- 473ml with pump
- 1L without pump

ARMONY

ALL-PURPOSE CLEANER

- ✓ Plant-based **antibacterial cleaner** and **degreaser**
- ✓ **Safe for the family**, even in case of accidental ingestion
- ✓ **No rinsing** required on food surfaces or toddler toys
- ✓ **Fragrance-free**, hypoallergenic and certified free of harmful contaminants

ALL-PURPOSE AND MULTI SURFACES

Our all-purpose cleaner can be used with great efficiency, regardless of the surface: stainless steel, mirror, kitchen, children's toys, etc.

ALL-PURPOSE CLEANER

Formats :

- 710 ml
- 710 ml refill
- BULK at home 10L
- BULK in store

ARMONY

DISINFECTANT CLEANER

✓ Kills **99.99%** of bacteria, viruses and mold and provides residual antibacterial action that helps prevent contamination.
DIN02487578

- ✓ Ingredients from **natural sources**, certified free of harmful chemicals (quaternary ammonium free)
- ✓ **Biodegradable**, hypoallergenic and respectful of air quality

DISINFECTANT WITHOUT QUATERNARY AMMONIUM

The majority of "ecological" disinfectants use quaternary ammoniums as active ingredients.

Yet these molecules are known to promote asthma and be harmful to health. The use of these molecules is of high concern to the independent EWG organization.
(eg: Lysol, Attitude, Bionature, etc.)

DISINFECTANT CLEANER

Formats :

- 710 ml
- 710 ml refill
- BULK at home 10L
- BULK in store

ARMONY COMPOSTABLE WIPES

- ✓ Compostable, hypoallergenic and certified without harmful chemical compounds (quaternary ammonium free)
- ✓ Cleans and eliminates 99.99% of bacteria and viruses in one step. DIN02487578

MADE OF 100% VEGETABLE FIBER "MICROPLASTIC FREE"

The majority of disinfectant wipes are made with polluting and non-biodegradable plastic microfibers.

MULTI-PURPOSE WIPES

Formats :

- 70 wipes with dispenser
- 70 refill wipes

DISINFECTANTS WIPES

Formats :

- 70 wipes with dispenser
- 70 refill wipes

ARMONY

List of ingredients used in **ARMONY** products

Our Clean label approach:

The shortest quality natural-source ingredients list as possible

Water	Purified water
Hydrogen peroxide	Broad spectrum disinfectant. Food grade. FDA-GRAS
Lauric arginate	Edible plant-based antimicrobial surfactant made with arginine (amino acid) and lauric acid (fatty acid). Food grade, FDA GRAS
Coco glucoside	Plant-based detergent. Made with a blend of carbohydrate (corn) and a derivative of coconut oil. Food grade, FDA GRAS.
Organics acids	Ascorbic acid (vitamin C) and citric acid (lemon acidity) from natural sources. Food grade, FDA GRAS
Polysorbate 20	Plant-based co-surfactant made from sorbitol (sugar in fruit) and lauric acid (fatty acid). Food grade, FDA GRAS , certified free of ethylene oxide and 1,4-dioxane contaminants.
Essential oils	Plant-based, certified free of parabens, phthalates, solvents and pesticides. Used in minimal non-allergenic quantity. FDA GRAS.

*The optimal proportion of ingredients varies depending on the intended use.
Some ingredients are not used in all products. Patented formulas.*

We have a distribution network that covers Eastern Canada and is able to provide excellent service to local retailers. A zero-waste bulk service is also available with all our products.
